Work Experience

Product and User Experience Designer, Exago BI April 2019 – Present

- Consistently meet aggressive deadlines to deliver high-fidelity user interface, interaction, and copywriting designs to the development team.
- Persuade stakeholders of the need for user research as well as conducted interviews, surveys, usability testing, and first-click testing.
- Effectively communicate with customers, internal teams, and executives to advocate for end-user needs, collaborate in product design meetings, and present research insights and recommendations.
- Implement a component library and design system, accounting for WCAG 2.1 accessibility guidelines.
- Clearly document goals, scope, and expectations for projects.

User Experience Design Intern, Farm Credit Services of America Jan 2018 – Dec 2018

- Independently coordinated the project management, research, design, and development of a website.
- Built the solution, utilizing continuous research and testing methods (surveys, interviews, information architecture testing, first-click testing, and usability testing); working from a low-fidelity wireframe to an easy-to-use website.
- Balanced the wants and needs of four technology team leaders and facilitated discussions on the solution while highlighting research findings.
- Documented best practices for components of a design system.
